
**Workshop S1 | Precongress workshop for
Interventional Radiology - including simulator training** 10:00-15:00
(sponsored by Medtronic) Hall D

Speakers: B. Nemes, Z. Ruzsa

ESVM Board Meeting 12:00-16:00
Hall B

VAS Board Meeting 14:00-16:00
Hall C

*Combined Executive and Administrative Board
Meeting of IUA* 15:00-17:00
Hall A

CEVF Board Meeting 16:00-17:40
Hall B

MAÉT Board Meeting 16:00-17:40
Hall D

Opening Ceremony 18:00-22:00

18:00 IUA Welcome
Prof. John Fletcher

18:10 CEVF Welcome
Prof. Claudio Allegra

18:20 MAÉT Welcome
Prof. Gábor Menyhei

18:30 IUA: The World Vascular Forum
Prof. Peter Gloviczki

18:50 Past, Present and future of Heparins, Impact on Vascular Medicine
Prof. Jawed Fareed

19:10 The history of vascular intervention
Prof. Sigrid Nikol

19:30 The Hungarian influence to vascular surgery
Dr. Imre Bihari

19:50 Get together party in the Hotel Helia

Monday, 7th of September

08:10-09:40

GROWING EXPERIENCE WITH DOACS - SIMPLE AND EFFECTIVE ANTICOAGULATION IN EVERYDAY PRACTICE

(sponsored by Bayer)

Chair: Zs. Pécsvárady

Zs. Pécsvárady:	Welcome and introduction (5')
S. Haas:	Can special patient populations be treated with rivaroxaban single-drug approach ? (20')
P. Verhamme:	Practical aspects of DOACs in VTE treatment (20')
A. Komócsi:	Stroke prevention in high risk AF patients (20')
	Closing, Q & A

Tuesday, 8th of September

08:30-09:30

Influencing CVD evolution through risk factors

(sponsored by Alfa Wasserman)

Chairs: Zs. Pécsvárady, T. Urbanek

A. Nicolaides:	Targeting risk factors to prevent CVD (16')
F. Mannello:	Is there any marker for CVD progression? (16')
G.M. Andreozzi:	Prevention of CVD evolution: How to control risk factors (16')
J. Fareed:	Discussion (10')

Tuesday, 8th of September

09:40-10:40

Experienced protection – Optimised stroke prevention

(sponsored by Boehringer Ingelheim)

Chairs: J. Van Ryn, D. Bereczki

T. Habon:	Reassurance in daily practice – Dabigatran in perspective of experience – (20')
L Szapáry:	Protecting against the neurological complications of atrial fibrillation (20')
J. Van Ryn::	Increasing confidence with reversal agent – idarucizumab – (20')

Tuesday, 8th of September

10:50-11:50

Long term prevention of the recurrent DVT / PE

(sponsored by Pfizer)

Chairs: J. Fareed, A. Nicolaides

A. Nicolaides:	The problem of the DVT recurrence (25')
G. Gerotziafas:	The input of the haemostatic biomarkers in the new strategy for long term secondary prevention of VTE with DOAC (25')
	Discussion (10')

Wednesday, 9th of September

08:30-09:30

The burden of PAD

Chairs: D. Clement, G. Fowkes, K. Farkas

G. Fowkes:	General view of PAD epidemiology (15')
D. Clement:	Hypertension and carotid artery disease: increased risk? How to manage? (15')
K. Farkas:	New results from the " Evaluation of ABI in Hungarian Hypertensives (ERV) study population" (15')
E. Kolossváry:	Epidemiology of PAD related lower limb amputation and pitfalls of data reporting. (15')

GROWING EXPERIENCE WITH DOACS - SIMPLE AND EFFECTIVE ANTICOAGULATION IN EVERYDAY PRACTICE

08:10-09:40

(sponsored by Bayer)**Chair:** Zs. Pécsvárady

Zs. Pécsvárady:	Welcome and introduction (5')
S. Haas:	Can special patient populations be treated with rivaroxaban single-drug approach ? (20')
P. Verhamme:	Practical aspects of DOACs in VTE treatment (20')
A. Komócsi:	Stroke prevention in high risk AF patients (20')
	Closing, Q&A

M A1 | Deep venous thrombosis (60')

09:40-10:40

Chairs: B. van Bellen, J.J. Michiels

J.J. Michiels:	New developments in the diagnosis of acute deep vein thrombosis (DVT) and prevention of DVT recurrence and postthrombotic syndrome in primary care medicine 2015 (15')
B. van Bellen:	Reduction in the length of stay with rivaroxaban as a single-drug regimen for the treatment of deep vein thrombosis and pulmonary embolism (10')
P. Palacka :	Impact of venous thromboembolism on Overall Survival (OS) in Metastatic Urothelial Carcinoma (MUC) patients treated with first-line chemotherapy (10')
A. Visoná :	D-dimer levels and outcome in patients with acute pulmonary embolism and cancer (from Riete group) (10')
J. Hirmerova:	The association of factor V Leiden with various clinical patterns of venous thromboembolism - the factor V Leiden paradox (10')

M A2 | Intervention (deep vein) (60')

10:50-11:50

Chairs: M. Lugli ,T. Urbanek,

M. Lugli:	Deep vein reconstructive surgery: open and endovascular techniques. (25')
T. Urbanek :	The rationale for the early thrombus removal in the proximal acute deep vein thrombosis (25')
A. Berencsi:	Pharmaco-mechanical therapy of DVT (Hungarian experience) (10')

M A3 | IUA extraordinary general assembly (60')

12:30-13:30

M A4 | Epidemiological data of PAD (60')

14:00-15:00

Chairs: R. Castro-Ferreira, G. Menyhei

R. Castro-Ferreira:	Restenosis and development of contralateral disease after carotid endarterectomy, a retrospective study
T. Tsvetanov:	Quality of life - Comparison between patients with lower extremity peripheral arterial disease and patients with coronary heart disease
K. Farkas :	PAD and hypertension
R. Castro-Ferreira:	Following lower limb amputation - a five years retrospective study
E. Kolossváry :	Seasonal pattern of the critical limb ischemic events in the whole Hungarian population
G. Menyhei:	Vascunet Registry: why is it wort?

M A5 | Vascular biology (60')

15:10-16:10

Chairs: C. Lattimer, B. van Bellen

J. Fletcher:	M2 macrophages appear early in atherosclerotic plaque development and may contribute to formation of the atherosclerotic core
E. Szaboova:	Lp(a) is associated with plaque progression rather than with intima-media thickness and hyperfibrinogenemia
C. Lattimer:	Patients with varicose veins have faster gravitational venous drainage
B. van Bellen:	Inflammatory response to conventional and endolaser treatment of the internal saphenous vein
T. Molnar:	Low arterial L-arginine concentration predicts need for intraoperative shunt during carotid endarterectomy
N.Y. Luo:	Genetic Testing and Surgical Management for Aortic Pathologies in Loeys Dietz Syndrome

M B1 | Surgery vs intervention (60')

09:40-10:40

Chairs: Z. Szeberin, G. Biró.

Cs. Dzsiniich:	Acute carotid interventions
G. Biró:	Short time interval between the last symptomatic event to carotid endarterectomy is not a predictor for an increased stroke and mortality rate
A. Gratl.	Optimal timing for carotid endarterectomy and carotid artery stenting following index event – current evidence
Z. Szeberin:	Has EVAR changed the indication for aortic aneurysm repair ?
G. Menyhei:	Popliteal artery aneurysm: open or endovascular repair?
R. Simkin:	Laser ablation 1470: Hybrid and minimal procedures in varicose veins

M B2 | Intervention (arterial) (60')

10:50-11:50

Chairs: S. Nikol, Z. Bánsághi

S. Nikol:	Advanced options for the periferal arterial intervention (30')
Z. Bánsághi:	Real time, Non-contact, Microcirculation Measurement as Functional Guiding Method during CLI Revascularisation. Pilot study (15')
T. Tsvetanov:	Predictors of restenosis after carotid endarterectomy and carotid stenting (15')

**M B4 | Capillary artery and vein issues
European Society for Vascular Medicine (60')**

14:00-15:00

Chairs: J. Fletcher., S. Nikol

J.C. Wautrecht:	Definition of vascular acrosyndromes and related conditions (15')
J. Belch:	Screening in early systemic sclerosis improves outcome (15')
P. Carpentier:	Capillary microcopy in chronic venous insufficiency (15')
K. Roztocil:	Conclusions from the national registry of superficial vein thrombosis (15')

**M B5 | “No More Vascular Amputations”:
The VAS European Collaborative Action on PAD**

15:10-16:10

Chairs: M. Catalano, Zs. Pécsvárady

D. Olinic:	PAD and CLI Trends in Europe
E. Kolossváry:	Vascular Amputations: The VAS European Document
M. Catalano:	Screening or Diagnosis in PAD? The Central Role of Education and VAS European Projects
K. Farkas:	The VAS European Project “No more Vascular Amputations”: Awareness and “PAD&Vascular European Days
B. Fazeli:	European Biobank on Vascular Diseases ; a road to reach VAS “No More Amputation”

M C1 | Critical leg ischemia (60')

09:40-10:40

Chairs: E. Hussein, P.L. Antignani

P.L. Antignani:	New trends for pathophysiology and diagnosis in critical limb ischaemia
P. Poredos:	New trends for medical treatment in critical limb ischaemia
Zs. Pécsvárad:	Predicting the effect of prostanoid treatment in CLI (ILOCRITERIA study)
E. Hussein:	Infragenicular endovascular interventions for critical limb ischemia – PTA alone or Stent supported?
J. Madaric:	Characteristics of responders to cellular therapy in patients with critical limb ischemia
B. Amann-Vesti:	Different etiologies of upper extremity ischemia

M C2 | Diabetic foot (60')

10:50-11:50

Chairs: J. Fletcher, B. Amann-Vesti

J. Fletcher:	Management of diabetic foot (15')
B. Amann-Vesti:	Challenges of diabetic foot (15')
V. Fejfarova:	Could influence the psychosocial characteristics of patients with peripheral arterial disease and the diabetic foot the long-term outcomes of podiatric care? (10')
D. Kovács:	Examination of lower limb tissue perfusion in diabetic patients with retinopathy (10')
S. Papazoglou:	Can the increased levels of HbA1c predict the severity of Peripheral Arterial Disease in T2DM patients (10')

M P1

12:00-13:00

Chairs: J. Pitha, D. Olinic

- T. Umeda: Nine cases of venous anomalies associated with Abdominal Aortic Aneurysm Surgery
 S. Ito: Evaluation of left internal thoracic artery graft to chronic total occlusion of coronary artery by a Doppler guide wire
 R. Moia: Efficacy evaluation of different materials commonly used in AVMs endovascular treatment.
 P. Palacka: Critical limb ischaemia in immobile patients
 M. Rruchinina: Effect of metabolic syndrome on the rheological disorders in stroke patients
 B. Minkova: Hyperhomocysteinemia in patients with deep venous thrombosis
 E. Kalodiki: Endothelial pathogenesis results in the generation of a proteoglycan endocan in various diseases
 R. Bernardo da Silva: Aesthetic-functional classification of primary varicose veins: Comparative research between patients in Brazilian public Health System and private clinic
 F. Parv: Usefulness of venous ultrasound in follow-up of deep vein thrombosis in patients with pulmonary embolism

M P2

12:00-13:00

Chairs: R. Martini, P. Dragic

- S. Dimitrov: Evaluation of duplex ultrasound, CT-angiography and transcranial doppler in patients with carotid artery stenoses or occlusions
 R. Bernardo da Silva: Ultrasound examination of the hemodynamic behavior in infrainguinal revascularizations
 Sz. Róna: Laser Doppler assessment of the limb before and after below-the-knee angioplasty in critical limb ischemia
 N. Chaouch: Percutaneous angioplasty with endoprosthesis in Buerger disease
 S. Furukawa: Autopsic investigation of the morphological variations of the internal jugular venous valve
 P. Palacka: Prevention of venous thromboembolism in seniors - A matter of polymorbidity
 R. Avram: Edema of upper limb occurred late after surgery for breast cancer
 I. Szabó: A case report of May-Thurner syndrome in conjunction with retroperitoneal fibrosis causing iliac vein thrombosis. Intervention, or drug treatment?

Influencing CVD evolution through risk factors
(sponsored by Alfa Wasserman)

08:30-09:30

Chairs: Zs. Pécsvárady, T. Urbanek

- A. Nicolaidis: Targeting risk factors to prevent CVD (16')
- F. Mannello: Is there any marker for CVD progression? (16')
- G.M. Andreozzi: Prevention of CVD evolution: How to control risk factors (16')
- J. Fareed: Discussion (10')

Experienced protection – Optimised stroke prevention (60') 09:40-10:40
(sponsored by Boehringer Ingelheim)

Chairs: J. Van Ryn, D. Bereczki

- T. Habon: Reassurance in daily practice – Dabigatran in perspective of experience – (20')
- L Szapáry: Protecting against the neurological complications of atrial fibrillation (20')
- J. Van Ryn: Increasing confidence with reversal agent – idarucizumab – (20')

T A2 | Long term prevention of the recurrent DVT / PE (60') 10:50-11:50

Chairs: J. Fareed, A. Nicolaidis

- A. Nicolaidis: The problem of the DVT recurrence (25 ')
- G. Gerotziafas: The input of the haemostatic biomarkers in the new strategy for long term secondary prevention of VTE with DOAC (25')
- Discussion (10')

T A3 | Raynaud syndrome (60')

12:00-13:00

Chairs: J. Belch, P. Carpentier

- P. Carpentier: Incidence and natural history of Raynaud phenomenon (15')
- J. Belch: Guideline of Raynaud syndrome (15')
- I. Silva: Macrovascular endothelial-dependent flow mediated dilation and microvascular damage are clinical markers of severe peripheral microangiopathy in patients with Secondary Raynaud Phenomenon (15')
- K. Cankar: Microvascular response during local cold exposure - the effect of female sex hormones in females with normal menstrual cycle (15')

T A4 | Hemostasis (70')

14:00-15:10

Chairs: E. Kalodiki, R. Avram

- K. Lobastov: Thrombodynamics test reveals blood hypercoagulation at the background of standard pharmacoprophylaxis and predicts postoperative venous thrombosis in surgical patients at high risk
- R. Kreidy: Contribution of MTHFR C 677T mutation to the genetic susceptibility of deep vein thrombosis among the Lebanese population
- H. Nandurkar: The 78 kDa glucose-regulated protein (GRP78) binds to thrombomodulin and exhibits novel antithrombotic activities
- H. Nandurkar: CD39 is an antithrombotic and protects from ischaemia reperfusion injury by adenosine
- E. Kalodiki: Neutralization of bleeding induced by non-vitamin K oral anticoagulants by prothrombin complex concentrates alone and in combination with antifibrinolytic agents
- E. Kalodiki: Comparative anticoagulant and anti-inflammatory effects of sulodexide and enoxaparin in citrated whole blood
- R. Avram: Spontaneous retroperitoneal hematoma-rare but life-threatening complication in patients receiving anticoagulant therapy

T A5 | Arterial stiffness (60')

15:10-16:10

Chairs: B. Benczúr, M. Illyés

- M. Illyés: From clinical research to everyday practice: The impact of assessment of arterial stiffness
- A. Cziráki: Investigation of arterial stiffness parameters in clinical practice
- M. Catalano: Possible relationship between arterial stiffness and cardiovascular events in peripheral arterial disease
- B. Benczúr: Reference values of central blood pressure in adults using a validated non-invasive oscillometric method
- E. Hidvégi: Reference values of aortic pulse wave velocity in a healthy population aged 3-18 years
- D. Kovács: The influence of kidney transplantation on the impaired arterial stiffness

T B1 | Intervention (varicosity) I. (60')

09:40-10:40

Chairs: I. Bihari, A. Szabó

I. Bihari:	Influence of different patient conditions on varicose vein laser surgery
A. Szabó:	Treating veins with monopolar radiofrequency - experience and results of the EVRF system
I.B. Balint:	Two-year experience with cryosclerosis.
S. Olariu:	Cyrosipping – An alternative to surgical treatment of varicose
N. Abushov:	Comparative study of results of endovenous radiofrequency thermal ablation and open methods in patients with lower limb varicose disease
D. Radu:	Primary Varicose Disease Recurrent after Surgical Procedures

T B2 | Intervention (varicosity) II. (60')

10:50-11:50

Chairs: R. Simkin, F. Zernoviczky

R. Simkin:	Transdermal laser in the treatment of telangiectasies and reticular veins
M.E. Vuylsteke:	Endovenous Laser Ablation: The Role of Intraluminal Blood
P. Dragic:	Endovenous Thermal Ablation of Superficial Venous Reflux of the Lower Extremity Using Diode Laser 1470 nm and Radial Fiber
V. Semenuks:	Which method is better for endovenous treatment of varicose veins?
F. Zernoviczky:	Rational approach to SSV insufficiency - how to treat different types of popliteoparval junctions ?

T B3 | Central European Vascular Forum symposium (60')

12:00-13:00

Chairs: C. Allegra, J. Fletcher

C. Allegra:	Rivaroxaban and DVT: clinical experience
E. Kalodiki:	Superficial vein thrombosis - CEVF consensus document –
G.M. Andreozzi:	Consensus Document on intermittent Claudication: debated and still unsolved problems
V. Stvrtinova:	How to change the style of living in patients with chronic venous disease
J. Stvrtina:	Where is the border of the specialization in medicine? The role of vascular system and theory of fractals

T B4 | Endovascular repair (60')

14:00-15:00

Chairs: Cs. Dzsinih, P. Banga

Cs. Dzsinih:	Complications of TEVAR and their late outcome
N. Kittitirapong:	Factors predicting 30 day mortality in ruptured endovascular aneurysm repair
H. Maeda:	Clinical characteristics and early and late outcomes for Inflammatory abdominal aortic aneurysms - comparison of the outcomes after open surgical and endovascular aneurysm repair (EVAR) in literature reviews -
P. Banga :	Effect of supra-celiac aortic coverage on rates of spinal cord injury among patients treated for complex abdominal aortic aneurysms with fenestrated-branched stent-grafts
W. Jakuczun:	Results of endovascular treatment of ruptured abdominal aortic aneurysms
C. Pornwaragorn:	Outcome of pEVAR in Ramathibodi Hospital: the Preliminary report

T B5 | Clinical Hemorheology (60')

15:10-16:10

Chairs: K. Tóth, L. Bogár

K. Tóth:	The role of hemorheological factors in cardiovascular medicine (15')
G. Késmárky:	Haemorheological and circulatory investigations in peripheral artery diseases (15')
N. Németh:	Hemorheological and microcirculatory changes in ischemia-reperfusion (15')
L. Bogár:	Leukocyte antisedimentation rate predicts early nosocomial infections in trauma patients (15')

T C1 | Vascular imaging and tests (60')

09:40-10:40

Chairs: P. Kalina, C. Lattimer

C. Lattimer:	In-vivo haemodynamic testing of compression stockings
P. Kalina:	Misses, misinterpretations and mimics in vascular imaging of the head and neck
P. Kalina:	Vascular Imaging of the Head and Neck in Children
J. Pitha:	The role of ultrasound in evaluation of hemodialysis access
D. Tonello:	EchocolorDoppler-guided angioplasty of vascular access for hemodialysis
B. van Bellen:	Intima-media thickness: correlation between carotids, vertebral artery, aorta and femoral arteries

T C2 | Chronic venous disease (60')

10:50-11:50

Chairs: K. Roztocil, V. Stvrtinova,

K. Roztocil:	What is the role of drugs in venous ulcers?
R. Vellettaz:	PREVENT II Study
C.R. Lattimer:	The saphenous re-circulation ratio (SRR) may improve reflux quantification
R. Vellettaz:	PREVENT I Study
V. Stvrtinova:	Arterial hypertension in patients with chronic venous disease
T. Urbanek:	Postthrombotic syndorme - do we really know the predictive factors?

T C3 | Microcirculation (60')

12:00-13:00

Chairs: Á. Koller, M. Rossi

Á. Koller:	Update of the local mechanisms regulating microcirculation (15')
A. Murray:	New technics in the diagnosis of microcirculation (15')
M. Rossi:	Role of vasomotion in the clinical practice (15')
S. Novo:	Coronary microcirculation in patients with risk factors, chest pain and normal coronary epicardial arteries (15')

**T C4 | Update on cardiovascular prevention (60')
(organised by International Chapter of IUA)**

14:00-15:00

Chairs: S. Novo, P. Poredos

S. Novo:	Beyond the ESC Guidelines 2015 on cardiovascular prevention: Cholesterol even lower is even better? (15')
D. Celovska:	Clinical Significance of Baroreflex Sensitivity in Arterial Hypertension and Resistant Hypertension (15')
P. Poredos:	Effects of smoking on endothelial function and benefit of stop smoking for cardiovascular prevention (15')
T. Urbanek:	Sulodexide reduces the inflammatory phenotype of the endothelial cells stimulated by the serum from the chronic venous disease (15')

SESSION | Tuesday, 8th of September

HALL D

Editorial Board meeting of
International Angiology (60')

13:00-14:00

SESSIONS

IUA 2015 IN BUDAPEST, HUNGARY
06-09 SEPTEMBER 2015

T P1

13:00-14:00

Chairs: P. Soltész, J. Hirmenova

- T. Morisawa: Supervised intensive exercise training improves functional capacity and physical activity after endovascular revascularization
- S. Taniguchi: Transcatheter arterial embolization of anomalous systemic arterial supply to the normal basal segment of the left lung
- R. Castro-Ferreira: Giant bilateral iliac aneurysms with one-side rupture: a challenging approach
- T. Takahashi: Comparison of early postoperative recovery between endovascular revascularization and bypass surgery in patients with peripheral arterial disease
- J. Bujok: Effect of dietary flaxseed on thoracic aorta contractility and serum lipid profile in hypercholesterolemic rabbits.
- J. Fareed: Usefulness of dilute Russell's viper venom clotting time (DRVVT) for the routine monitoring of new oral anticoagulants
- J. Fareed: End-stage renal disease associated with metabolic syndrome: A study of biomarkers relevant to cardiovascular risk
- J. Fareed: Bovine and porcine mucosal heparins exhibit similar biologic profiles
- E. Szabó: A case report of inferior vena cava thrombosis accompanied by bilateral renal vein thrombosis. The role of venous interventions

T P2

13:00-14:00

Chairs: P.L. Antignani, G. Késmárky

- J. Fareed: Ovine mucosal heparin and enoxaparin are biosimilar to their porcine counterparts
- K. Gáspár: A case report of iliofemoral vein thrombosis, provoked by retroperitoneal lymphedema, lymphangitis and retroperitoneal abscess. The importance of previous radical gynecological operations as a risk for subsequent venous-lymphatic circulation disturbance
- N. Schahab: Endovascular Treatment of Complications of Femoral Arterial Access Following Percutaneous Interventions
- A. Ligers: Intraarterial thrombolysis in acute and semiacute limb ischaemia: a 3-year single-centre experience.
- S. Cho: Aorto-Mediastinal Fistula after Aortic and Mitral Valve Replacement
- O. Tímár: Effect of rosuvastatin treatment on endothelial function and ankle-brachial index in patients with systemic sclerosis
- R. Bernardo da Silva: Predictive failure's results in the spectral analysis during the surveillance of infrainguinal revascularization through vascular ultrasound
- S.M. Kim: Effect of deep vein reflux on venous outcome following radiofrequency ablation for saphenous vein incompetence
- M. Bosevski: Venous thromboembolism – Usefulness of national registries

The burden of PAD

08:30-09:30

Chairs: D. Clement, G. Fowkes, K. Farkas

- G. Fowkes: General view of PAD epidemiology (15')
D. Clement: Hypertension and carotid artery disease: increased risk? How to manage? (15')
K. Farkas: New results from the " Evaluation of ABI in Hungarian Hypertensives (ERV) study population" (15')
E. Kolossváry: Epidemiology of PAD related lower limb amputation and pitfalls of data reporting. (15')
-

W A1 | Mayo Clinic Update on Critical Issues in Vascular Disease (60')

09:40-10:40

Chairs: P. Gloviczki, P. Kalina

- P. Gloviczki: The current state of endovascular repair of popliteal arterial aneurisms. (20')
R.C. Shields: Managing bleeding complications of the new oral anticoagulation agents (20')
R.C. Shields: Applications of hyperbaric oxygen therapy in peripheral arterial disease (20')
-

W A2 | Surgical treatments of special cases (60')

10:50-11:50

Chairs: M. Szostek, M. Malas

- M. Szostek: Endovascular treatment of thoracic aorta pathologies with abnormal anatomy of the arch
M. Malas: AAA Repair in Octogenarians: Is it Worth the Risk?
A. Hamadé: Superior vena cava syndrome treated by stenting: 16 cases
S. Prasertcharoensuk: Comparison between distal vein ligation and no ligation on forearm swelling after loop forearm AVG: a randomized controlled trial
F. Li: Two new techniques of renal autotrasplantation for renal artery disease involving the renal hilum.
G. Szostek: Penetrating arterial ulceration?
-

W A3 | Wound care (60')

12:00-13:00

Chairs: W. Trubel, Gy. Szolnoky

- P.L. Antignani: Advanced dressings and venous ulcers: what level of evidence? (15')
Gy. Szolnoky: Wound care update (15')
W. Trubel: The Vascular Surgeon's role in the interdisciplinary treatment of chronic wounds (15')
O. Mutlak: The Influence of Exercise on Ulcer Healing in Patients with Venous Leg Ulcer (15')
-

W B2 | Lymphology (60')

10:50-11:50

Chairs: P.Gloviczki, J. Daróczy

Gy. Szolnoky:	The future of lymphoedema treatment (20')
P. Gloviczki:	The current state of microsurgical lymphatic reconstruction (20')
J. Daróczy:	Complications of chronic peripheral lymphoedema (20')

W B3 | Vasculitis, Buerger disease (60')

12:00-13:00

Chairs: P. Soltész B. Fazelli

P. Soltész:	New therapeutic approach in catastrophic antiphospholipid syndrome
Gy. Kerekes:	Takayasu Arteritis: Staying alive without the direct perfusion of brain
B. Fazeli:	Rickettsia infection could be the missing piece of the Buerger's disease puzzle
B. Fazeli:	Buerger's Disease from an Artistic point of view
N. Abushov:	Influence of ozonated autohemotherapy on systemic inflammatory response in patients with thromboangilitis obliterans and critical lower limb ischemia
Á. Diószegi:	Rheopheresis treatment in peripheral arterial disease

**Workshop S1 | Precongress workshop for
Interventional Radiology - including simulator training**
(sponsored by Medtronic)

10:00-15:10

Peripheral lower limb intervention course
(Medtronic Academia)

Part I. / Basics

10:00-10:30

Speaker: Z. Ruzsa

- Objectives of peripheral angiography / intervention
- Basic lower limb anatomy & views
- Radioprotection
- Hands on session I.

Coffe break

10:30-10:40

Part II. / Diagnostic angiography

10:40-12:10

Speaker: B. Nemes

- Diagnostic & pre-procedural assessment
- Procedure preparation
- Patient preparation and vascular access
- Haemodynamics
- Choice of materials (Diagnostic- GW, Sheath, Diagnostic catheter)
- Digital subtraction angiography
- Hands on session II.

Lunch break

12:10-12:40

Part III. / Lower Limb Intervention

12:40-15:10

Speakers: B. Nemes, Z. Ruzsa

- Choice of materials (Sheath, GW, Balloon and Stent)
- Aortoiliac intervention (Step-by-step) (Z. Ruzsa)
- Femoro-politeal artery intervention (Step-by-step) (B. Nemes)
- Below the knee intervention (Step by step)
- Anterograde technique (B.Nemes)
- Rentrograde technique (Z.Ruzsa)
- Hands on session III

Workshop M1 | Venous intervention (60')

16:20-17:20

Sponsored by

Speakers: I. Bihari, F. Zernoviczky

Subject: Sclerotherapy technics, EVLT-, Radiofrequency ablation, glue sclerotherapy
Practice: Hands-on in phantoms. Ultrasound guided sclerotherapy

Workshop M2 | Capillarmicroscopy in the clinical practice (60')

16:20-17:20

Sponsored by Perimed France

P. Carpentier: Capillary microscopy: limits, pitfalls, tips and tricks
J. Belch: Nomenclature of vascular acrosyndromes

Hands-on: capillarmicroscopy

Workshop M3 | French Society Vascular Medicine Interactive Postgraduate Course 1 (60')

16:20-17:20

J.C. Wautrecht: Strange digital ulcers... and more.
J. Decamps LeChevoir: No Sport for the Radial Artery.
C. Le Hello: Atypical aneurysm: everything ventured, everything gained !

Workshop M4 | Arterial Intervention on simulator (60')

16:20-17:20

Sponsored by Medtronic

Moderators: Z. Bánsághi, I. Király

WORKSHOP | Tuesday, 8th of September

Workshop T1 | Wound care (60')

16:20-17:20

Sponsored by Hartmann

Moderators: Gy. Szolnoky, J. Hunyadi, J. Móricz:

Hands-on: Vivano system, intelligent bandage

**Workshop T2 | French Society Vascular Medicine
Interactive Postgraduate Course 2 (60')**

16:20-17:20

P. Carpentier: Just a Tiny Cutaneous Vein Thrombosis !
